Lindsey Street Utility Project Updates 6/19/2015

Multiple utility projects are currently in the works along Lindsey Street under contract with the City of Norman. Weather permitting, the following progress is expected during the next several days. Warning and detour signs will be placed to assist the motoring public. Please use increased caution in all construction zones.

- PM Construction completed sewer replacement work along Lindsey between Berry Road and Pickard Avenue. This portion of the road re-opened Thursday morning, June 18.
- Central Contracting Services continues water line enhancements along Lindsey between Flood Avenue and Pickard. This portion of the road is expected to reopen by 7 a.m. on Thursday, June 25. Please note, future closings are anticipated along segments of Lindsey and Berry as this project continues.
- McKee Construction continues installation of 24-inch waterline along the south side of Lindsey. Work has been completed from 24th Avenue to McGee Drive and will now progress east of McGee towards Berry Road. Eastbound traffic on Lindsey, between McGee and Wylie Road, will be shifted to the center lane. This work will also require temporarily closing private driveways on the south side of Lindsey; driveway crossings will generally be performed after normal business hours unless multiple access points are available.
- Cimarron Construction will continue installation of a common utility trench along the north side of West Lindsey. Westbound traffic on Lindsey will be shifted to the center lane between 24th Avenue Southwest and Murphy Street. This work will also require temporarily closing private driveways on the north side of Lindsey; driveway crossings will generally be performed after normal business hours unless multiple access points are available.
- Insituform Technologies is rehabilitating the 21-inch sewer interceptor along the south side of Lindsey from McGee to Berry. Driveway closures are necessary to transport sewer flows through above ground piping while the below ground piping is being rehabbed.

Temporary closure of roads and private driveways on the south of Lindsey are outlined below:

- From 5 p.m. Sunday, June 21 to 8 a.m. on Tuesday, June 23, Wylie Street south of its intersection with Lindsey will be closed. Southbound traffic on Wylie is urged to use alternate routes such as Berry to Rebecca Lane to Wylie. Northbound traffic may use this same route or may use the public alley south of Lindsey and east of Wylie to gain access through the various businesses.
- From 8 p.m. Sunday, June 21 to 8 a.m. Monday, June 22, drives between the eastern boundary of Hollywood Shopping Center to just east of Wylie will be closed temporarily.

- From 8 p.m. Monday, June 22 to 8 a.m. Tuesday, June 23, drives just west of Wylie to just west of Berry will be closed temporarily.
- From 5 p.m. Tuesday, June 23 at 5 p.m. to 8 a.m. on Thursday, June 25, McGee south of its intersection with Lindsey will be closed. Northbound traffic on McGee is urged to use alternate routes such as Cherry Stone to Crown Point to Lindsey or Vine to Berry to Lindsey. South bound traffic on McGee is urged to use alternate routes such as Crown Point to Cherry Stone to McGee.
- From 8 p.m. Tuesday, June 23 to 8 a.m. on Wednesday, June 24 drives between McGee and the eastern boundary of Hollywood Shopping Center will be closed temporarily.

Contact Chris Serrano, City of Norman Utility Coordinator, at 366-5265 or chris.serrano@normanok.gov with questions. For detailed information on the Lindsey Street Project, visit www.lindseystreetnorman.com.
